

Opal

Technical data

Applications

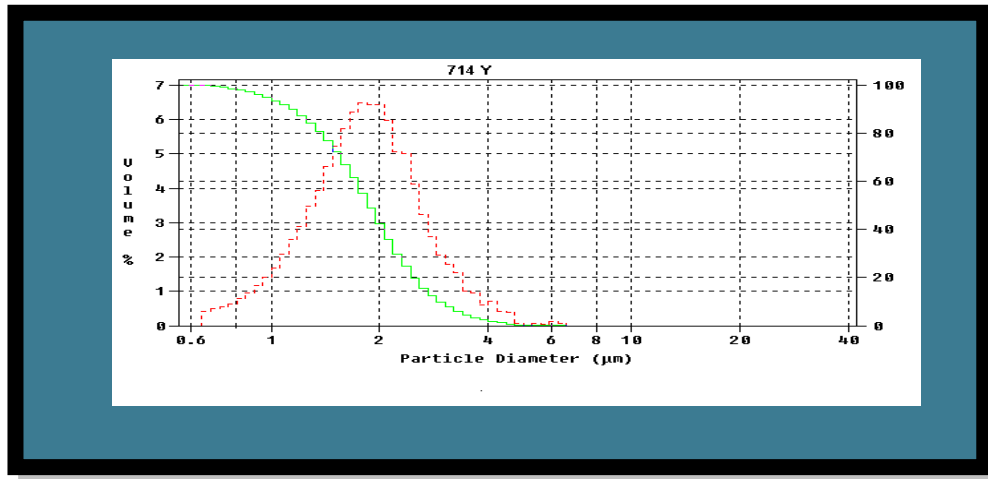

Precision engineered for :

- High removal and good surface quality on CR-39, High Index, and Polycarbonate surfaces
- Aggressive use in polycarbonate dedicated systems
- Economical prices.

Typical physical properties

Appearance :	White Slurry
pH :	3.0 - 4.2
Particle size (Coulter) :	D50 - 1.2 à 2.2 μm
Baumé :	18 - 22 °
Suspension treated :	Yes

Particle size distribution

Packaging

4 gal/case - 144 gal/pallet

Cautions

No freeze issues : Product can be re-thawed, mixed and used
Do not mix with any other product formulations
Refer to Material Safety Data Sheet
