

PLASTIC MEDIA

Technical Data

Description

Plastic medias consist of soft, reusable plastic particles applied at low pressure, resulting in optimum performance for a variety of coating removal needs.

Plastic medias do not alter tolerances or damage most surfaces, long lasting with minimum dust.

Applications

Removing paint with no rust. Used in aircraft, boating, automotive, electrical, rubber and plastic mold industry.

Range

Type II Urea :

- Angular to round in shape, available in sizes from 12/16 to 40/60.
- Mohs hardness is 3.5 with a specific gravity of 1.5

Type III Melamine :

- Angular to round in shape, available in sizes from 12/16 to 40/60.
- Mohs hardness is 4 with a specific gravity of 1.5

Packaging

Paper bags 25 Kg.
